

ROADLED by Aplyled

With these unique Led Street lighting for tunnel or a road, where lighting is on for extended periods, the system's energy efficiency results in cost savings as high as 75% in the medium term. Similarly, in a sports complex or a manufacturing facility, which can require intensive lighting, the quality/consumption ratio delivers immediate advantages.

Data based on the lighting of 1 km street with luminaires every 30 m working 4.200 hours per year.
